

COVERAGE NAME: CALPMA

COVERAGE AREA: Statewide

COVERAGE DESCRIPTION:

The CALPMA layer is a statewide polygon coverage which represents the California EPA's classification of geographic areas within California as to their status in attaining National Ambient Air Quality Standards for particulate matter (PM10). The coverage shows California EPA designated areas (comprised of counties, partial counties, air basins, hydrologic units and PLSS sections) and contains attribute information revealing the attainment designation, the severity of non-attainment and other information. Coding is based on information provided by the California Environmental Protection Agency.
